ARVESSA
HEALTH PARTNERS

Building World-Class Healthcare Partnerships for Africa

A Pan-African Healthcare Development & Strategic Partnerships Platform

ARVESSA HEALTH PARTNERS LIMITED

Building the Institutions Behind Better Healthcare

Africa's healthcare opportunity is significant.
Governments are investing in modern infrastructure.
Private capital is seeking credible opportunities in health.
International hospital groups are exploring new markets.
Medical technology companies are expanding their reach.
Experienced African healthcare professionals around the world want meaningful ways to contribute.

Yet the success of a healthcare institution depends on far more than buildings and equipment.

Arvessa connects African healthcare opportunities with the expertise, institutions, capital, technology and talent required to transform them into sustainable healthcare institutions.

WHO WE ARE

A Pan-African Healthcare Development & Strategic Partnerships Platform

Arvessa Health Partners Limited is focused on building, transforming and scaling high-quality healthcare institutions across Africa.

OUR PLATFORM TODAY

- **Project origination and institutional structuring**
- **Operator-neutral partner identification**
- Government, investor and technology alignment
- Diaspora and clinical partnership development

OUR GROWTH HORIZON

- **Selective participation in operating platforms and joint ventures**
- **A portfolio of scalable Centres of Excellence**
- Long-term investment vehicles and healthcare ventures

Seven core divisions connect institutional development with partner-enabled capability transfer and patient-access solutions.

Current capabilities and future ambitions are presented separately to support transparent institutional engagement.

OUR PURPOSE

Bridging the Gap Between Healthcare Infrastructure and Healthcare Institutions

A sophisticated building does not automatically become a high-performing hospital. Advanced equipment alone does not produce excellent outcomes. Capital alone does not guarantee sustainable operation.

THE INSTITUTIONAL GAP

People

Systems

Governance

Aligned partnerships

Our Direction

VISION

To become one of Africa's most trusted healthcare development and strategic partnership platforms, enabling excellent healthcare institutions, clinical performance and sustainable investment across the continent.

MISSION

To originate and develop healthcare opportunities by connecting African governments, institutions and investors with operators, clinical expertise, technology, capital, diaspora talent, capability transfer and patient-access partners.

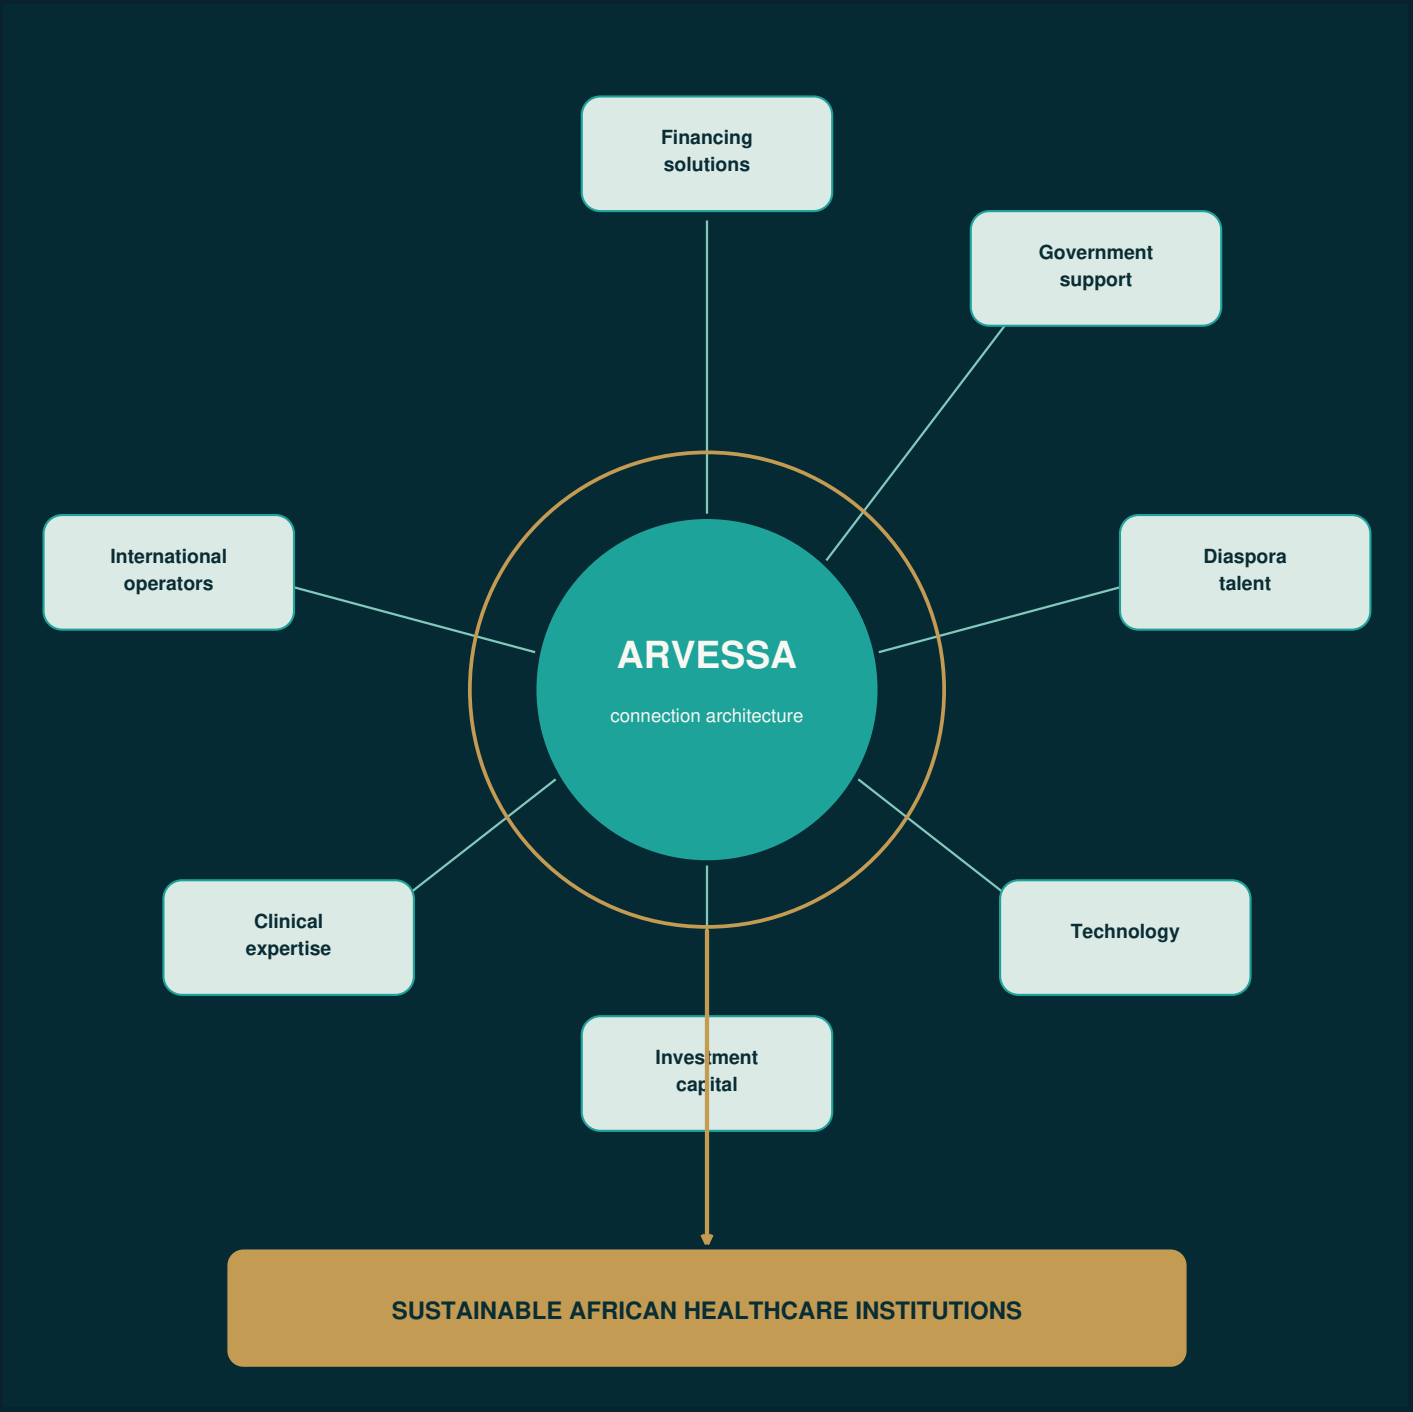

PURPOSE

To help create institutions that patients trust, clinicians are proud to work in, governments can sustain, partners can support and investors can responsibly back.

One Platform. Multiple Capabilities.

Arvessa aligns the capabilities that complex healthcare projects need around one viable institutional model.

Capability transfer and sustainable patient access strengthen the institutional model through qualified academic, clinical and licensed financing partners.

STRATEGIC BUSINESS PILLARS

An Integrated Healthcare Development Platform

01 **Project origination**

02 **Hospital partnerships**

03 Hospital operations

04 Diaspora mobilisation

05 Infrastructure and technology

06 Investment and capital

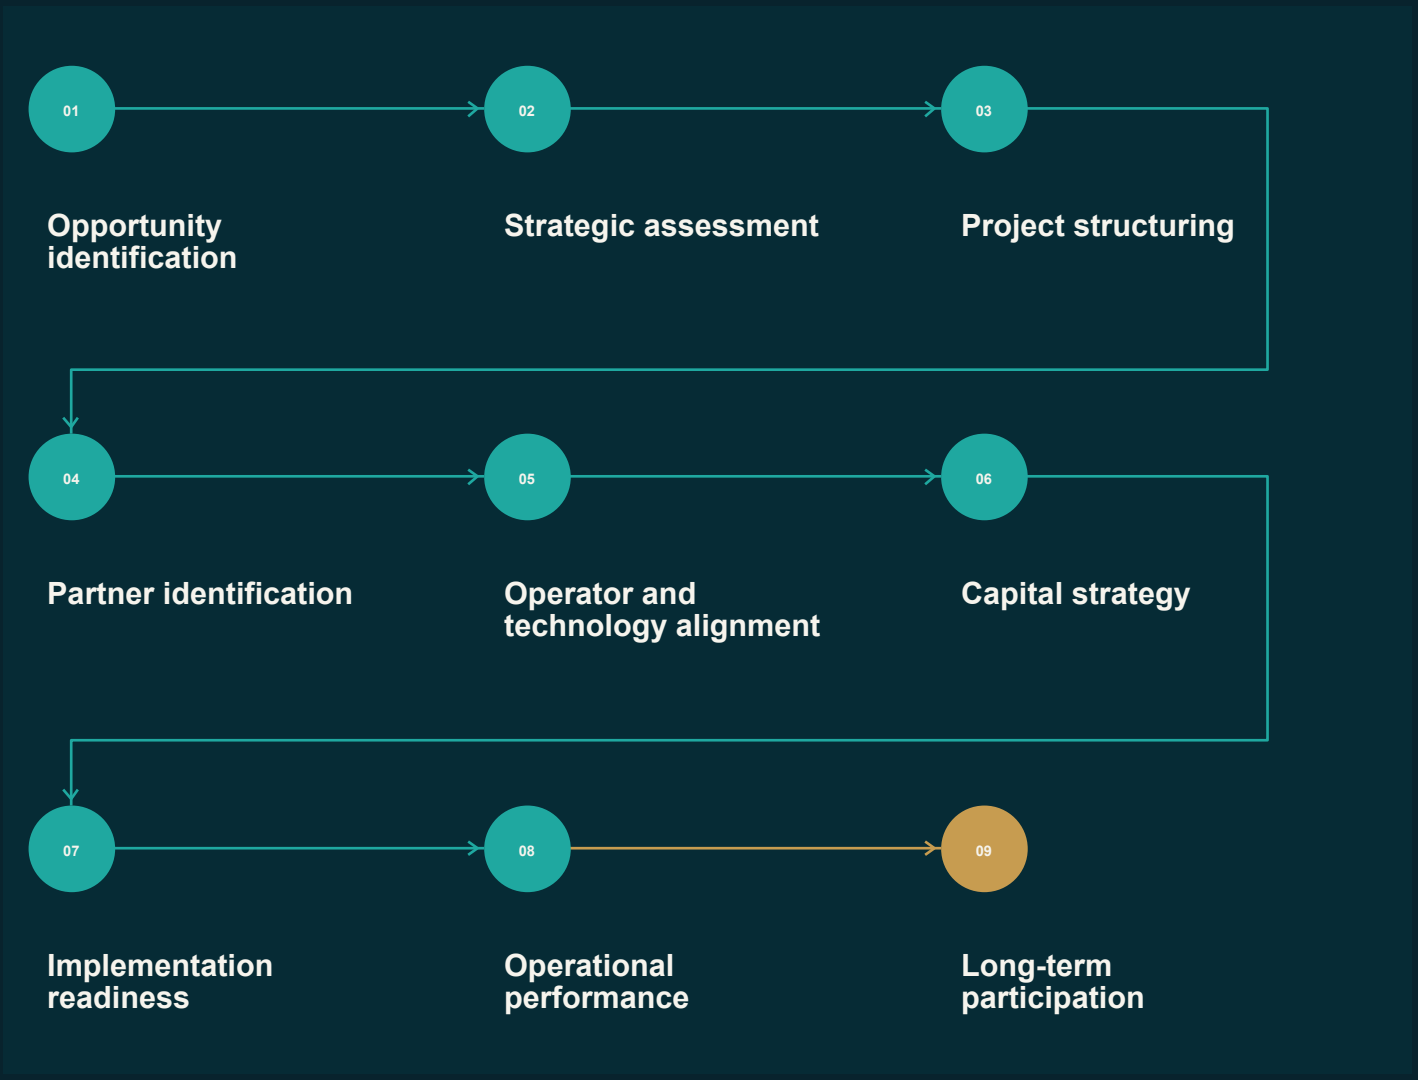

07 Access and financing

08 Government and PPPs

09 Capability transfer / Arvessa Academy

From Opportunity to Execution

Arvessa originates and develops opportunities across Africa, including new hospitals, existing assets requiring transformation, specialist centres, diagnostic networks, medical campuses, public-private partnerships and healthcare investment platforms.

Global Institutional Capability Closer to Africa

Arvessa develops partnerships between African healthcare institutions and leading international hospital systems. The aim is to bring operating knowledge and specialist capability closer to patients while building capacity within Africa.

- **Hospital management and O&M partnerships**
- **Clinical affiliations and Centres of Excellence**
- Technical services and selected service-line partnerships
- Visiting specialist and joint clinical programmes
- Fellowships, observerships, CME and structured training
- Virtual clinical networks, telemedicine and teleradiology
- International referral and second-opinion pathways

Moving Beyond Infrastructure Into Performance

Hospital management is where infrastructure, clinical expertise, people, finance and systems converge. Arvessa participates through strategic joint ventures, management arrangements and technical partnerships with experienced operators.

- **Clinical governance**
- **Commissioning and readiness**
- **Workforce planning**
- **Patient-flow design**
- **Quality management**
- **Procurement**
- **Revenue-cycle systems**
- **Performance management**
- **Accreditation readiness**

International standards / Local capability / Sustainable operations

Clinical Leadership in High-Impact Specialties

A Centre of Excellence can combine international clinical leadership, visiting consultants, resident teams, training, technology, clinical protocols and measurable outcomes.

01 **Cardiac sciences**

02 **Oncology**

03 **Neurosciences**

04 **Renal medicine and transplantation**

05 **Orthopaedics and trauma**

06 **Critical care**

07 **Women's health**

08 **Fertility and reproductive medicine**

09 **Gastroenterology and hepatology**

10 **Nuclear medicine**

11 **Rehabilitation**

12 **Advanced diagnostics**

This model allows institutions to introduce advanced services without immediately restructuring an entire hospital.

Reconnecting Africa With Its Global Clinical Talent

Africa's healthcare professionals contribute to leading hospitals and universities around the world. Arvessa intends to create structured pathways through which their expertise can strengthen institutions on the continent.

- **Visiting consultant appointments**
- **Specialist rotations and sabbaticals**
- Virtual multidisciplinary teams
- Clinical mentorship and training
- Research collaboration
- Executive clinical leadership
- Permanent return pathways

Global Expertise. African Capability.

The strongest long-term model combines international specialists, African diaspora clinicians and resident local professionals, supported by strong institutional systems and technology.

01	**International specialists**	Complex procedures, mentoring and clinical governance
02	**Diaspora clinicians**	Continuity between international and African systems
03	**Resident teams**	Sustainability, institutional memory and local capability
04	**Institutional systems**	Protocols, technology and measurable performance

Capability transfer with lasting local ownership

ARVESSA ACADEMY

Capability Transfer as Institutional Infrastructure

Arvessa Academy is the capability-transfer arm of Arvessa Health Partners. It develops structured pathways through which healthcare professionals and institutions can access education, clinical training, leadership development and institutional capacity-building through qualified academic and clinical partner institutions.

01 International fellowships & observerships

02 CME / CPD & specialist clinical attachments

03 Nursing & allied-health training

04 Hospital-management & healthcare leadership

05 Clinical governance & quality programmes

06 Digital-health & technology training

07 Diaspora-led masterclasses & visiting faculty

08 Executive education & institutional capacity-building

09 International training partnerships

Programme delivery, academic eligibility, clinical supervision, credentialing and certification remain with the relevant partner institution unless otherwise formally accredited. Arvessa does not hold itself out as a medical school or awarding body.

Technology Aligned With the Clinical Model

Arvessa helps institutions identify, finance, deploy and sustainably manage appropriate solutions. Technology must connect to the operating model, workforce plan, maintenance framework and long-term institutional strategy.

Advanced imaging

Oncology systems

Critical-care equipment

Electronic medical records

Artificial intelligence

Biomedical engineering

Laboratory medicine

Surgical technology

Hospital information systems

Telemedicine

Remote monitoring

Teleradiology & remote diagnostics

Building Investable Healthcare Opportunities

Healthcare requires patient capital. Investors require credible operating models, appropriate governance, realistic demand assumptions and capable partners. Arvessa works to bridge that divide.

Project developer

Strategic partner

Co-investor

Equity participant

Consortium member

Local operating partner

Over time, Arvessa intends to build a selective portfolio of healthcare interests through joint ventures, specialist platforms and operating businesses.

Expanding Access Alongside Capacity

Access is the objective; financing and insurance partnerships are mechanisms. Arvessa Health Access structures partnerships with licensed HMOs, insurers, employers, banks, fintech platforms, development finance institutions and governments to improve patient access to quality healthcare through sustainable financing models.

- **Licensed HMOs**
- **Insurers**
- **Employers**
- **Governments**
- **Banks and financial institutions**
- **Fintech platforms**
- **Development finance institutions**
- **Healthcare financing partners**

Potential models include employer health programmes, treatment financing and medical credit, subscription/payment models, high-cost procedure pathways, insurer-provider partnerships, development-finance-backed access and government-supported or NHIA-linked programmes where applicable.

Arvessa Health Partners does not hold itself out as a licensed HMO, insurer or financial institution. Healthcare financing and insurance-related activities are pursued through appropriately licensed partners and regulated entities.

Government Partnerships With Long-Term Public Value

Arvessa works with governments, ministries, agencies and public hospitals to develop models that combine public purpose with private-sector capability.

01

Public healthcare need

02

Structured opportunity

03

International partnership

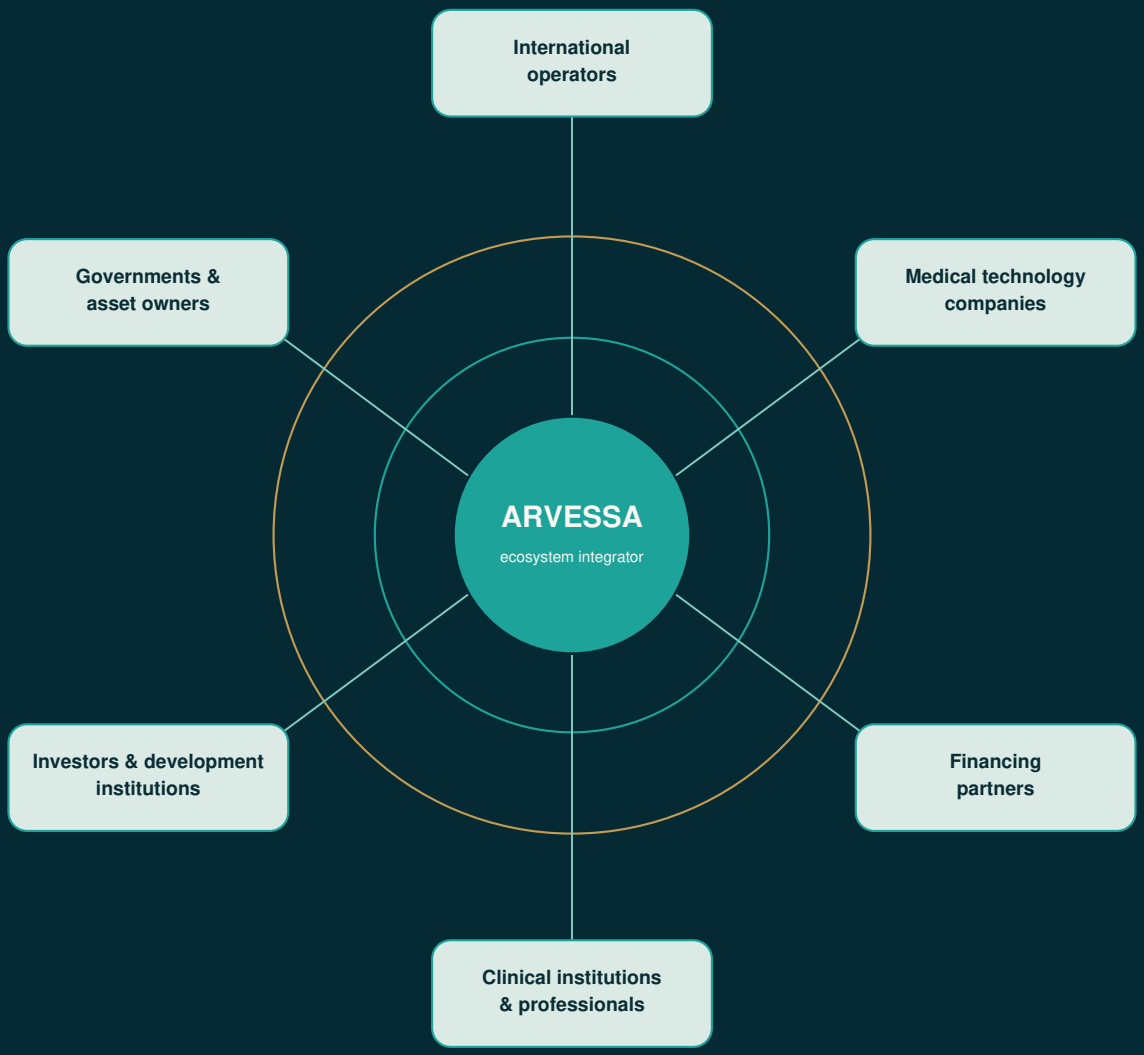

04

Sustainable institution

OUR PARTNERSHIP ECOSYSTEM

Healthcare Transformation Requires an Ecosystem

Aligned capabilities. Shared standards. Sustainable institutions.

Each participant contributes a distinct capability. Arvessa aligns them around the institution, governance model and long-term operating purpose.

Academic and clinical institutions enable capability transfer. Licensed insurers, HMOs and financing partners enable sustainable patient-access pathways.

A Distinctive Institutional Development Platform

Arvessa is designed for complex healthcare opportunities that require more than a conventional adviser or a single operator.

01	**Operator neutrality**	The project can select the operating partner best suited to its mandate.
02	**Africa-grounded execution**	Local institutional understanding shapes structure, mobilisation and implementation.
03	**International institutional access**	A single platform connects credible operators, clinical institutions and technology partners.
04	**Diaspora mobilisation**	Structured pathways turn global African expertise into sustained institutional capacity.
05	**Integrated project structuring**	Clinical, operating, governance, capital and access models develop together.

Arvessa Academy and Arvessa Health Access connect capability transfer and sustainable patient access to the same institutional model.

A Credible Platform for African Market Entry

Africa represents significant long-term opportunity for international healthcare organisations. Entering a new market, however, requires credible projects, local relationships, regulatory understanding and disciplined implementation.

- **Market and opportunity assessment**
- **Government and institutional engagement**
- Project origination and structuring
- Local partnership development
- Commercial and operating-model alignment
- Implementation and regulatory coordination
- Localisation and knowledge transfer
- Long-term stakeholder management

Clinical Credibility and Commercial Discipline

Arvessa helps capital providers assess and shape healthcare opportunities through an operating lens, not simply as real-estate or equipment projects.

Pipeline access	Origination of healthcare opportunities with institutional relevance
Partner alignment	Operator, clinical, technology and public-sector coordination
Project development	Feasibility, structure and implementation planning
Governance	Clear roles, decision rights and performance expectations
Participation	Potential co-investment, consortium or strategic equity roles

Technology Embedded in Sustainable Care Delivery

Arvessa offers a structured route into credible healthcare projects and helps align technology with clinical demand, workforce readiness, financing, maintenance and lifecycle management.

Qualified project opportunities

Early clinical and technical planning

Stakeholder and operator coordination

Equipment-financing pathways

Commissioning and user readiness

Biomedical maintenance planning

Digital integration

Long-term account development

The aim is technology that remains clinically useful and operationally supported throughout its lifecycle.

One Master Brand. Seven Core Divisions.

ARVESSA HEALTH PARTNERS

01 **Hospital Partnerships**

Operations, O&M, commissioning and international operator partnerships

02 **Clinical Partnerships**

Centres of Excellence, clinical affiliations, visiting specialist programmes and virtual clinical networks

03 **Health Infrastructure**

Hospital development, medtech, diagnostics and digital systems

04 **Health Ventures**

Project development, co-investment, capital partnerships and SPVs

05 **Advisory**

Government strategy, PPPs, operator selection and institutional transformation

06 **Arvessa Academy**

Fellowships, observerships, CME/CPD, leadership development and capability transfer

07 **Arvessa Health Access**

Insurance partnerships, patient financing, employer programmes and access solutions through licensed partners

One master brand. Seven core divisions. One institutional standard.

Partnership Before Prescription

Each engagement begins with the institutional objective and the realities of the local context. The model, partners and capital structure follow from that foundation.

01	**Understand**	Clarify need, mandate, asset condition and desired outcomes
02	**Structure**	Define the clinical, operating, governance and commercial model
03	**Assemble**	Align clinical, operating, technology, capital, education and access partners
04	**Implement**	Coordinate readiness, mobilisation and institutional launch
05	**Strengthen**	Track performance, transfer capability and support scale

Leadership and Advisory Council

Arvessa is building a leadership and advisory structure that brings together healthcare operations, clinical leadership, investment, infrastructure, public policy and African market experience.

LEADERSHIP

Dr. Chikwendu Okoh

FOUNDER & EXECUTIVE CHAIRMAN

Dr. Chikwendu Okoh is the Founder and Executive Chairman of Arvessa Health Partners Limited. With a professional background spanning medicine, enterprise development and complex institutional partnerships, he provides strategic leadership for Arvessa's mission to connect African healthcare opportunities with international institutional capability.

HEALTHCARE ADVISORY COUNCIL

Arvessa's advisory structure draws expertise across Healthcare Operations, Clinical Leadership, Investment & Finance, Infrastructure & Technology, Public Policy and African Markets.
